

**Chat Logs for Ephemeral Premiere w/Dizzy Banjo
Sunday, Jan 18, 2009. Second Life**

Dizzy Banjo: So, this was a film we made over at Princeton's Aspire sim, here in SL. The main purpose of it initially was to document the build, which was by Poid Mahovlich

Dizzy Banjo: Really most of the work in it, is in the build. The look and feel is all established by the set really. I just pointed a camera !

Dizzy Banjo: I really tried to make SL look better than it normally does, with a number of custom windlight settings. When you use windlight in this way, you can obscure the shortcomings of the SL engine, (draw distance .. rendering lots of objects slowly etc) with things like fog and distance multiplier. There wasnt any post processing during editing.

Deruub Pastorelli: :)

GToon Jun: nice

Sol Bartz: Wow, none at all? Wow.

Dizzy Banjo: the rest of it is just the use of in world particle effect (snow and stuff)

Lem Skall: the default windlight settings suck

Deruub Pastorelli: nice start

Dizzy Banjo: yeah it can really produce far better results than the defaults

Chantal Harvey: noce foley

Chantal Harvey: nice

Dizzy Banjo: the "story" of this is quite loose and developed as we were making it really, just discussing it with Poid

Sol Bartz: I know, Chantal, isn't the sound great?

Chantal Harvey: it is!

Dizzy Banjo: we went around and got some interesting avatars

Jana Kyomoon: very nice

Janford Flax: i love the music

Dizzy Banjo: from Rezzables carnival sim i think

Dizzy Banjo: and some from SLEXchange, from various creators

Dizzy Banjo: i think for me the story is about passing on

Chantal Harvey: you buy audio on sl exchange?

Jce Emoto: I'm sorry, can't see it. Quicktime doesnt supoprt anything before Windows XP nomore, sinde then nomore SL Vid for me (and older QT alternative doesnt do it).. shame.. maybe later i get an XP or Vista system up again.

Chantal Harvey: oh my i never thought

Lucien Franciosa: bravo

Dizzy Banjo: oh the music is me
Starshine Halasy: what a bummer Jee
